

ZAXIS-5G series

HITACHI

Reliable solutions

ZAXIS70

HYDRAULIC EXCAVATOR

Model Code : ZX70-5G / ZX70LC-5G
Engine Rated Power : 42.4 kW (56.9 HP)
Operating Weight : ZX70-5G : 6 650 - 6 950 kg
: ZX70LC-5G : 6 710 - 7 020 kg
Backhoe Bucket : ISO Heaped : 0.13 - 0.33 m³

ZAXIS Empower your Vision.

The new ZX70 has evolved with a number of improvements including engine torque, durability and maintainability to earn more production and profits. It is rugged and sturdy for operation under tough environment, reducing downtime.

Maintenance is also simplified to increase uptime.

The new ZX70 empowers your visions and dreams, shaping your future.

Shown equipped with an optional 4-side reinforced arm and pre-cleaner.

More Production with Less Fuel

Page 4-5

- 7% less fuel consumption
- 22% more engine torque
- Improved heat balance
- Low-effort pilot lever

Operator Comfort

Page 6

- Comfortable operating environment
- Full-auto air conditioner (Standard)
- CRES cab

Highest Criteria of Sturdiness and Durability

Page 7

- WC thermal spraying at arm-bucket joint
- Reinforced bucket (Optional)
- 4-side reinforced arm (Optional)
- Track frame undercover (Optional)

Hitachi Heritage of High Maintainability

Page 8

- Fuel double-filters (Standard)
- Dust-proof indoor net
- Easy-to-clean big fuel tank
- Battery disconnect switch (Optional)

Hitachi Support Chain

- Parts and service

Note: The pictured ZX70 is equipped with an optional blade.

More Production with Less Fuel. Meeting Two Competing Needs

Covers with higher cooling efficiency

7% Down Fuel Consumption*

Hitachi fuel-saving technology is more evolved than ever. The electronically controlled engine can curb fuel consumption behind the electronic governor, clutch fan, and isochronous control, which is one of fuel-saving technologies that can automatically control engine rpm through the electronic governor. This can suppress wasteful engine speed increase when big output is not needed, leading to less fuel consumption.

*Hitachi measurements in P mode under standard digging test conditions

22% Up Engine Torque

The new engine is designed to increase its maximum torque to keep running without speed drop at high altitudes with thin air and in hot summer season. At its maximum torque, the speed is kept low to ensure stable performance even under heavy loads.

Improved Heat Balance

Even at high temperatures in summer or in continuous long hours operation, the ZX70 can lessen overheating, as cooling efficiency increases: heat balance is up 4% in engine coolant, and up 12% in hydraulic oil, compared to the conventional.

Low-Effort Pilot Lever

The new fingertip-control pilot lever reduces operator fatigue in long hours operation. This pilot lever resembles the one proven on the ZX200 in the larger class.

Shown equipped with an optional 4-side reinforced arm and pre-cleaner.

Enhanced Operator Comfort with Refined Controls and Cab Interior

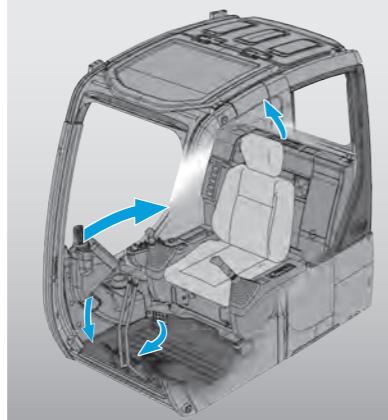

Comfortable Operating Environment

The cab is improved to enhance operator comfort and controllability. The monitor panel is positioned for easy reading from the operator.

Twin analog meters are easy to read operating status. The simple-to-control switch panel is within easy reach. The comfortable vinyl-made operator seat is provided with a headrest and armrests, and is precisely adjustable to operator's build. It can be reclined and slid for pleasant positioning.

Monitor panel indicators are shown lit for demonstration. Auto Idle and indicators disable.

Full-Auto Air Conditioner (Standard)

The full-auto air conditioner can keep preset in-cab temperatures by blowing fresh air. Air flow and outlets are adjusted automatically. Bi-level air flow makes it possible to warm leg space and cool head space simultaneously.

Wider view of machine footing (right)

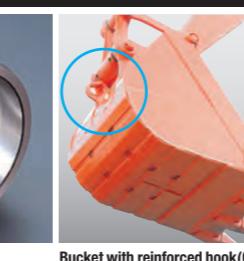

Drink holder

Hot & cool box

One-touch front window lock

Highest Criteria of Sturdiness and Durability Gives Higher Productivity

WC Thermal Spraying at Arm-Bucket Joint

WC (Tungsten-Carbide) thermal spraying is applied on surfaces of the arm-bucket joint to form hardening layers to reduce wear and jerking significantly.

Reinforced Bucket (Optional)

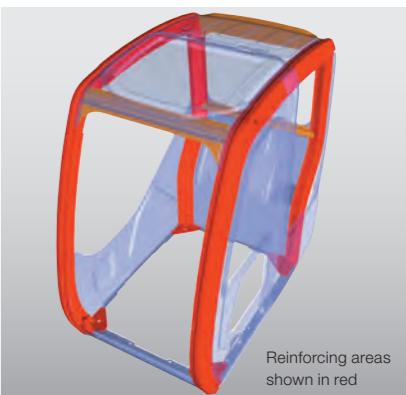

The flat bottom type bucket protects its welds with wear plate. The 0.28 m³ reinforced bucket is provided optional with reinforcing plates at its bottom.

4-Side Reinforced Arm (Optional)

The arm top is strengthened with reinforcing plates on its four sides to withstand high loads.

Track Frame Undercover (Optional)

The track frame bottom is protected with a full-length undercover against obstacles.

CRES Cab

Neutral engine start system

The pilot control shut-off lever is provided with a neutral engine start system that permits engine starting only when the pilot control shut-off lever is in Lock position.

CRES* Cab

The CRES cab is reinforced with high-rigidity steel tubes at corners to significantly increase strength and rigidity for higher safety.

*CRES: Corner Reinforced Structure

Hitachi Heritage of High Maintainability to Reduce Downtime

Fuel Double-Filters (Standard)

Fuel double-filters are utilized in a fuel line from fuel tank to engine to avoid plugging. Also, a solenoid fuel pump is provided standard to release air if water is mixed in fuel or fuel runs out.

Dust-Proof Indoor Net

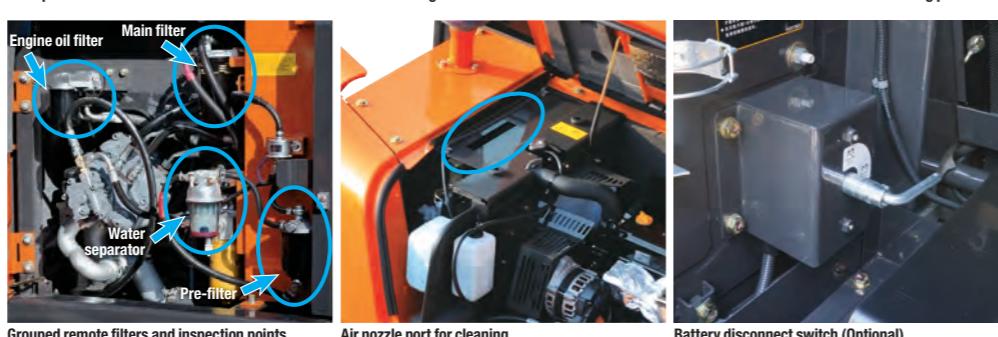

The radiator is provided with a detachable dust protective net at its front to avoid dust entry. The net is made of three-split type for easy, quick servicing. An air nozzle port at the radiator top facilitates cleaning.

Easy-to-Clean Big Fuel Tank

The fuel tank has the ample capacity of 135 liters. Its inlet is sealed with a keyed cap for water proof type. At the bottom of the fuel tank a drain cock, which serves to easily discharge contaminants inside, and a bolted cleaning port for easy opening and cleaning.

Battery Disconnect Switch (Optional)

This battery disconnect switch is provided to avoid battery discharging and protect harnesses when the machine is not in use in winter or in long-term storage.

Hitachi Support Chain

Hitachi Support Chain is a full customer support system offered after buying a Hitachi machine.

Parts and Service

Hitachi full customer support is available every area on the globe for full customer satisfaction through Hitachi local dealers.

Parts

Hitachi Global Online Network, a parts supply system, is linked with Japan Parts Center, overseas depots and over 150 dealers abroad to deliver on-line parts information, including in-stock parts, order receptions, shipments and delivery period of over one million parts and components.

Genuine Hitachi Parts

Genuine Hitachi parts, meeting Hitachi stringent quality standards, are guaranteed according to Hitachi warranty standards. The use of genuine Hitachi parts, including engine, fuel, hydraulic oil and filters, may slash running costs, and extend machine life.

Ground Engaging Tools (GETs)

Hitachi provides an array of Hitachi Ground Engaging Tools developed and built for a variety of applications. Using high-quality, well-maintained GETs will help you get customers' trust.

Note: Some dealers do not handle Hitachi GETs.

Remanufactured Components

Hitachi components are remanufactured according to the stringent remanufacturing standards at four factories around the world. They have high quality equivalent to new ones, and backed up by Hitachi warranty system.

Note: Some dealers do not handle Hitachi Remanufactured Components.

Service

Extended Warranty — HELP

Hitachi Standard Warranty System is available on all new Hitachi machines. In addition, Hitachi offers Hitachi Extended Life Programs (HELPs) to suit customer expectations – protecting machines under tough operating conditions, avoiding unexpected downtime, and reducing repair costs.

Note: Warranty conditions vary by equipment.

Diagnostic Tools — Maintenance Pro

Electronic control system needs quick on-site solutions, apart from mechanical repairs. Hitachi's Maintenance Pro can diagnose machine failures in a short time by plugging a PC into a failed machine.

Technical Training

On-site servicing matters despite locations to keep the machine at peak performance and reduce downtime. Technical Training Center (TTC), located in Japan, educates and trains service technicians and service support personnel coming from Hitachi dealers and factories on the globe according to the international training programs.

SPECIFICATIONS

ENGINE

Model	Yanmar 4TNV98-AVHBW (CHN Stage II)
Type	4-cycle water-cooled, direct injection
No. of cylinders	4
Rated power	
ISO 9249, net	42.4 kW (56.9 HP) at 2 100 min ⁻¹ (rpm)
SAE J1349, net	42.4 kW (56.9 HP) at 2 100 min ⁻¹ (rpm)
Maximum torque	236 Nm (24.1 kgf.m) at 1 350 min ⁻¹ (rpm)
Piston displacement	3.318 L
Bore and stroke	98 mm x 110 mm
Batteries	2 x 12 V / 52 Ah

HYDRAULIC SYSTEM

Hydraulic Pumps	
Main pumps	3 variable displacement axial piston pumps
Maximum oil flow	2 x 63 L/min
.....	1 x 52.5 L/min
Pilot pump	1 gear pump
Maximum oil flow	21 L/min

Hydraulic Motors

Travel	2 variable displacement axial piston motors
Swing	1 axial piston motor

Relief Valve Settings

Implement circuit	26.0 MPa (265 kgf/cm ²)
Swing circuit	22.6 MPa (230 kgf/cm ²)
Travel circuit	31.4 MPa (325 kgf/cm ²)
Pilot circuit	3.9 MPa (40 kgf/cm ²)

Hydraulic Cylinders

	Quantity	Bore	Rod diameter
Boom	1	115 mm	65 mm
Arm	1	95 mm	60 mm
Bucket	1	85 mm	55 mm
Blade (Optional)	1	120 mm	70 mm

UPPERSTRUCTURE

Revolving Frame

D-section frame skirt for resistance to deformation.

Swing Device

Axial piston motor with planetary reduction gear is bathed in oil. Swing circle is single-row. Swing parking brake is spring-set/hydraulic-released disc type.

Swing speed

10.7 min⁻¹ (rpm)

Swing torque

12.9 kNm (1 320 kgf.m)

Operator's Cab

Independent spacious cab, 1 005 mm wide by 1 675 mm high, conforming to ISO* Standards.

* International Organization for Standardization

UNDERCARRIAGE

Tracks

Heat-treated connecting pins with dirt seals. Hydraulic (grease) track adjusters with shock-absorbing recoil springs.

Numbers of Rollers and Shoes on Each Side

Upper roller	1
Lower rollers	5
Track shoes	38 : ZX70-5G 40 : ZX70LC-5G

Travel Device

Each track driven by 2-speed axial piston motor.

Parking brake is spring-set/hydraulic-released disc type.

Automatic transmission system: High-Low.

Travel speeds

High : 0 to 5.0 km/h

Low : 0 to 3.4 km/h

Maximum traction force ..

47.8 kN (4 870 kgf)

Gradeability

70% (35 degree) continuous

SERVICE REFILL CAPACITIES

Fuel tank	135.0 L
Engine coolant	8.0 L
Engine oil	11.6 L
Travel device (each side)	2.5 L
Hydraulic system	100.0 L
Hydraulic oil tank	60.0 L

WEIGHTS AND GROUND PRESSURE

Including bucket 0.28 m³ (ISO heaped) weight (211 kg), arm 1.62 m and counterweight (800 kg).

LIFTING CAPACITIES (Without Bucket)

- Notes: 1. Ratings are based on ISO 10567.
 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 4. *Indicates load limited by hydraulic capacity.
 5. 0 m = Ground.

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities without bucket.

EQUIPMENT

Standard and optional equipment may vary by country, so please consult your Hitachi dealer for details.

● : Standard equipment ○ : Optional equipment

ENGINE	CAB	MONITOR SYSTEM	UNDERCARRIAGE
Air cleaner ●	All-weather sound suppressed steel cab ●	Alarm buzzers: ●	Blade ○
Air cleaner double filters ●	AM-FM radio with digital clock ●	Engine oil pressure and engine overheat ●	Bolt-on sprocket ●
Alternator 60 A ●	Ashtray ●	Meters: ●	Hydraulic track adjuster ●
Auto idle system ●	Auto control air conditioner ●	Hourmeter and trip-meter, engine coolant temperature gauge and fuel gauge ●	Reinforced track links with pin seals ●
Cartridge-type engine oil filter ●	Cigarette lighter 24V ●	Pilot lamps: ●	Travel motor covers ●
Cartridge-type fuel pre-filter ●	CRS Cab (Corner reinforced structure) ●	Engine preheat, work light, auto-idle ●	Travel parking brake ●
Cartridge-type fuel main filter ●	Drink holder ●	Warning lamps: ●	Triple grouser shoe 450 mm ●
Dry-type air filter with evacuator valve (with air filter restriction indicator) ●	Electric horn ●	Alternator charge, engine oil pressure, engine overheat, air filter restriction and minimum fuel level, engine, pilot control shut-off lever warning ●	Upper and lower rollers ●
Dust-Proof indoor net ●	Engine stop switch ●		
Electric fuel feed pump ●	Evacuation hammer ●		
E/P mode control ●	Fire extinguisher bracket ○		
Fan guard ●	Floor mat ●		
Pre-cleaner ○	Footrest ●		
Radiator reserve tank ●	Front window washer ●		
Water separator ●	Front windows on upper, lower and left side can be opened ●		
HYDRAULIC SYSTEM	UPPERSTRUCTURE	LIGHTS	FRONT ATTACHMENTS
Boom anti-drift valve ●	Glove compartment ●	2 working lights ●	Arm 1.62 m ●
Control valve with main relief valve ●	Hot & cool box ●		Arm 2.12 m ○
E-P control system ●	Intermittent windshield wipers ●		Boom 3.72 m ●
Full-flow filter ●	Lower cab front guard ○		Bucket clearance adjust mechanism ●
One extra port for control valve ●	OPG top guard Level I (ISO10262) compliant cab ○		Bucket 0.28 m ³ (ISO heaped) ●
Pilot filter ●	Pilot control shut-off lever ●		Centralized lubrication system ●
Shockless valve in pilot circuit ●	Seat belt ●		Dirt seal on all bucket pins ●
Suction filter ●	Seat : fabric seat ○		HN bushing ●
	Seat : mechanical suspension seat ○		Monolithically cast bucket link A ●
	Seat : vinyl seat ●		Reinforced resin thrust plate ●
	Seat adjustment part : backrest, slide forward / back ●		WC (tungsten-carbide) thermal spraying ●
	Sun visor ○		4-side reinforced arm ○
	Upper cab front guard ○		
	4 fluid-filled elastic mounts ●		
ATTACHMENTS	OTHERS		
		Accessories for breaker ○	
		Accessories for breaker & crusher ○	
		Accessories for 2 speed selector ○	
		Attachment basic piping ○	
		Global e-Service ○	

MEMO

Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Our Environmental Vision envisions a low-carbon society; a resource efficient society; a harmonized society with nature. To achieve such a sustainable society, we have established a set of long-term environmental targets called Hitachi Environmental Innovation 2050.

Reducing Environmental Impact by New ZAXIS

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. New ZAXIS utilizes lots of technological advances, including the new ECO mode, and Isochronous Control. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

These specifications are subject to change without notice.
Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features.
Before use, read and understand the Operator's Manual for proper operation.
